

## Features of a Proposed Project

<b>Project Name:</b>	<b>Electricity Meters</b>	
<b>Purpose of the project:</b>	<b>Production of electricity meters used in homes and different facilities to measure energy consumption</b>	
<b>Field/Sector:</b>	<b>Engineering (Power) Industries</b>	
<b>Targeted Markets:</b>	<b>Local Market</b>	
<b>Production Capacity as an Example :</b>	<b>500,000 meters / year</b>	
<b>Required Land Area:</b>	<b>1000 m<sup>2</sup></b>	
<b>Area of Buildings:</b>	<b>600 m<sup>2</sup></b>	
<b>Main Raw Materials and Supplies:</b>	<b>Plastic raw materials</b>	
	<b>Electronic powders</b>	
	<b>Screws and connecting tools</b>	
<b>Main Project Machinery and Equipment:</b>	<b>Plastic injection machine</b>	
	<b>Plastic molds</b>	
	<b>Horizontal and vertical component installing lines by powder</b>	
	<b>Calibration and testing devices</b>	
<b>Annual Consumptions of the Project:</b>	<b>Consumption of Electricity</b>	<b>154 M.W.H</b>
	<b>Consumption of Water</b>	<b>500 m<sup>3</sup></b>
<b>Labour Required:</b>	<b>30</b>	
<b>Project Products:</b>	<b>Electricity Meters</b>	

**N.B.:** This study is a rough estimate of the Example; a detailed visibility study should be conducted.
