

## Features of a Proposed Project

<b>Project Name:</b>	Plywood boards covered with veneer sheets	
<b>Purpose of the project:</b>	Manufacture of plywood boards covered with veneer sheets which are used in manufacturing of diverse wooden furniture	
<b>Field/Sector:</b>	Engineering Industries	
<b>Targeted Markets:</b>	Local Market	
<b>Production Capacity as an Example:</b>	100.000 boards / year	
<b>Required land area:</b>	5000 m <sup>2</sup>	
<b>Area of Buildings:</b>	3000 m <sup>2</sup>	
<b>Main Raw Materials and Supplies:</b>	Beech wood	
	Swedish wood	
	Oak wood	
	Pine wood	
<b>Main Project Machinery and Equipment:</b>	Compressors	
	Wood dissection machine	
	Band saw	
	Wood working machine	
	Wood glue machine	
<b>Annual Consumptions of the Project:</b>	• Consumption of Electricity	575 M.W.H
	• Consumption of Water	1000 m <sup>3</sup>
<b>Labour Required:</b>	25	
<b>Project Products:</b>	Plywood boards covered with veneer	

**N.B.:** This study is a rough estimate of the Example; a detailed feasibility study should be conducted.
