

Features of a Proposed Project

Project Name:	Fruit concentrates	
Purpose of the project:	Production of fruit concentrates to be used as a raw material for manufacturing of natural fruit juices and other food industries	
Field/Sector:	Food Industries	
Targeted Markets:	Local Market / Export	
Production Capacity as an Example:	3000 tons/year	
Required land area:	5000 m ²	
Area of Buildings:	3000m ²	
Main Raw Materials and Supplies:	Diverse raw fruits	
	Packing materials	
Main Project machinery and equipment:	Reception belt	
	Washing machine	
	Sorting belt	
	Fruit grinding machine	
	Strainer to separate the crusts and seeds	
	Evaporator to concentrate the juice	
	Pasteurization device	
	Packing machine	
	6-ton steam boiler	
	Chiller	
Annual Consumptions of the Project:	• Consumption of Electricity	750 M.W.H
	• Consumption of Water	6,000 m ³
	• Consumption of Gas	600,000 m ³
Labour Required:	40	
Project Products:	Fruit concentrates	

N.B.: This study is a rough estimate of the Example; a detailed feasibility study should be conducted.
